---

I build frontend interfaces in React and TypeScript, and I get paid to read code a model wrote and say what is wrong with it. I trained as a pharmacist first, which is where I picked up the habit of checking things twice before they reach someone else.

Experience

Frontend developer and AI code evaluator

Independent, remote · Nov 2025 – Present

> Build React and Vite interfaces with reusable components, hooks and Tailwind CSS.

> Debug form validation, conditional rendering, routing, async data and responsive layout problems in JavaScript and TypeScript.

> Read model-written code and answers, and judge them for correctness, instruction following, edge cases and what the user actually asked for.

> Write feedback that names the bug, explains why it bites and shows the version that works.

Software engineering intern

AltSchool Africa · Jan 2024 – Dec 2025

> Worked through engineering tasks in JavaScript, React, Node.js, HTML and CSS.

> Built and reviewed interfaces with attention to responsive layout, reusable components and accessibility.

> Practised debugging, code review and technical writing, which is the same work the evaluation job pays for now.

Full stack developer trainee

Zuri Team · May 2022 – Sep 2022

> Built frontend interfaces in HTML, CSS and JavaScript.

> Built backend services in Python and Django.

Pharmacy intern

Federal Medical Centre, Keffi · May 2025 – May 2026

> Clinical pharmacy rotations covering dispensing, ward rounds and patient counselling.

> The habit this job teaches is the one the evaluation work pays for: check the thing twice before it reaches someone else.

Selected projects

React Todo / Productivity App

Task manager with typed routes, Zod-validated forms and pagination that keeps its place.

todo-app-tsc-mauve.vercel.app/

E-Commerce Product Page

Product page with a gallery, cart state and one responsive layout built from a design file.

e-commerce-product-page-one-ashy.vercel.app/

Space Tourism Website

Four content types sharing one navigation shell, spacing system and page transitions.

space-tourism-toni.vercel.app/

Education

B.Pharm, Pharmacy

University of Nigeria, Nsukka
2017 – 2023

Diploma in software engineering

AltSchool Africa
Jan 2024 – Dec 2025

Licensure

Provisional pharmacist licence

Feb 2024

Full pharmacist licence

Oct 2026

Skills

AI evaluation

AI evaluation, LLM evaluation, data annotation, multimodal annotation, prompt-response review, rubric-based grading, edge-case testing

Frontend

React, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, HTML, CSS

Backend and data

Node.js, Python, Django, REST APIs

Tools

Git, GitHub, Vercel, pnpm, Linux, Chrome DevTools
