Client and project details under NDA.

> Author expert-level tasks designed to stump frontier models in chemistry, biology and clinical pharmacy, across text, image, video and terminal-based formats.

> Grade outputs for accuracy, instruction following, reasoning quality and safety against detailed guidelines.

> Rate and compare model responses side by side, and verify factual claims against sources.

> Annotate image, video and audio data.

> Apply pharmacy and chemistry knowledge to catch confident but incorrect answers in clinical and scientific content.

> Consistently meet quality bars across concurrent projects, with tasks rated at the top of the reviewer scale.

Selected projects

Who's on my ballot? (launching November 2026), whosonmyballot.ng

A free voter information site for Nigeria's 2027 elections. Built a data pipeline that turns INEC's official candidate lists into more than 26,000 static pages, and a polling-unit lookup covering 177,299 units that runs in the browser. Tested to show its main content in about 2 seconds on a simulated slow 3G connection.
